

ECM-909A

SERVICE MANUAL

*US Model
Canadian Model
AEP Model
E Model*

SPECIFICATIONS

General

Type	One-point stereo (employing the Mid-side system), electret condenser microphone (with back-electret condenser capsules)
Output plug	Stereo miniplug
Microphone cord	2.9 mm dia. two core-shielded, OFC (Oxygen-free copper)
Dimensions	Length: Approx. 1.5 m (59 1/8 inches) 30 x 115.5 mm (Outside diameter x length) (1 3/16 x 4 5/8 inches)
Mass	Approx. 90 g (3 oz) including battery
Supplied accessories	Wind screen (1) Microphone holder (1) Carrying case (1) Stand screw adaptor SAD-35 (1)

Performance

Frequency response	100 – 15,000 Hz
Directivity	Directive angle : 90° or 120° (switchable)
Output impedance	1 kilohm \pm 20 % unbalanced
Sensitivity (directive angle 120°)	Open circuit output voltage*1 : -50 ± 3 dB Effective output level*2 : -56 ± 3 dBm Difference between L and R channel sensitivity : Less than 3dB
Power requirements	Normal operating voltage : 1.5 V, R6 (size AA) battery Minimum operating voltage : Approx. 1.1 V Battery life : Approx. 200 hours with a Sony R6P (size AA) battery
Signal-to-noise ratio	More than 62 dB (1,000 Hz, 1 Pa)
Maximum sound pressure level*3	More than 120 dBsPL
Operating temperature range	0 °C to 45 °C (32 °F to 113 °F)

*1 0 dB = 1 v/Pa, 1,000 Hz (1 Pa = 10 μ bar = 94 dBsPL)

*2 0 dBm = 1 mW/Pa, 1,000 Hz

*3 1 % wave distortion is present at 1,000 Hz.
(0 dBsPL = 2×10^{-5} Pa)

Design and specifications are subject to change without notice.

Optional Accessory

To connect this microphone to the equipment with a microphone jack other than stereo minijack, use the following connecting cord.

PC-137S
(Stereo minijack \leftrightarrow miniplug/phone plug adaptor x 2)

Features

This microphone is suitable for use in a variety of situations such as at a concert or a conference with the portable stereo recorder (Sony DAT, WALKMAN Professional, etc.).

- The directive angle (between left and right channels) can be set to 90° or 120° according to the sound source.
- The microphone gives excellent sound image and faithful stereo sound reproduction with less "hole in the middle".

**ELECTRET CONDENSER
STEREO MICROPHONE
SONY®**

Parts Identification and Uses

1 Wind screen

Attach to reduce wind or breathing noise.

2 Battery check indicator

When the power/directive angle switch is turned from OFF to ON, this indicator lights momentarily. When the battery becomes weak, the indicator remains dimly lit or does not light at all. In this case, replace the battery with a new one.

3 Power/directive angle switch

Set the switch in accordance with the sound source.

Battery Installation

When to replace the battery

When the power is turned on, the battery check indicator lights momentarily. When the battery becomes weak, the indicator remains dimly lit or does not light at all. In this case, replace the battery with a new one.

Sony R6P (size AA) battery gives continuous operation of the microphone for about 200 hours.

Notes on battery

To avoid damage to the unit caused by battery leakage and corrosion;

- Install the battery with correct polarity.
- Do not try to recharge batteries.
- Remove the battery if the microphone is not to be used for a long period of time.

In case of battery leakage, wipe off any deposit in the battery compartment before installing a new battery.

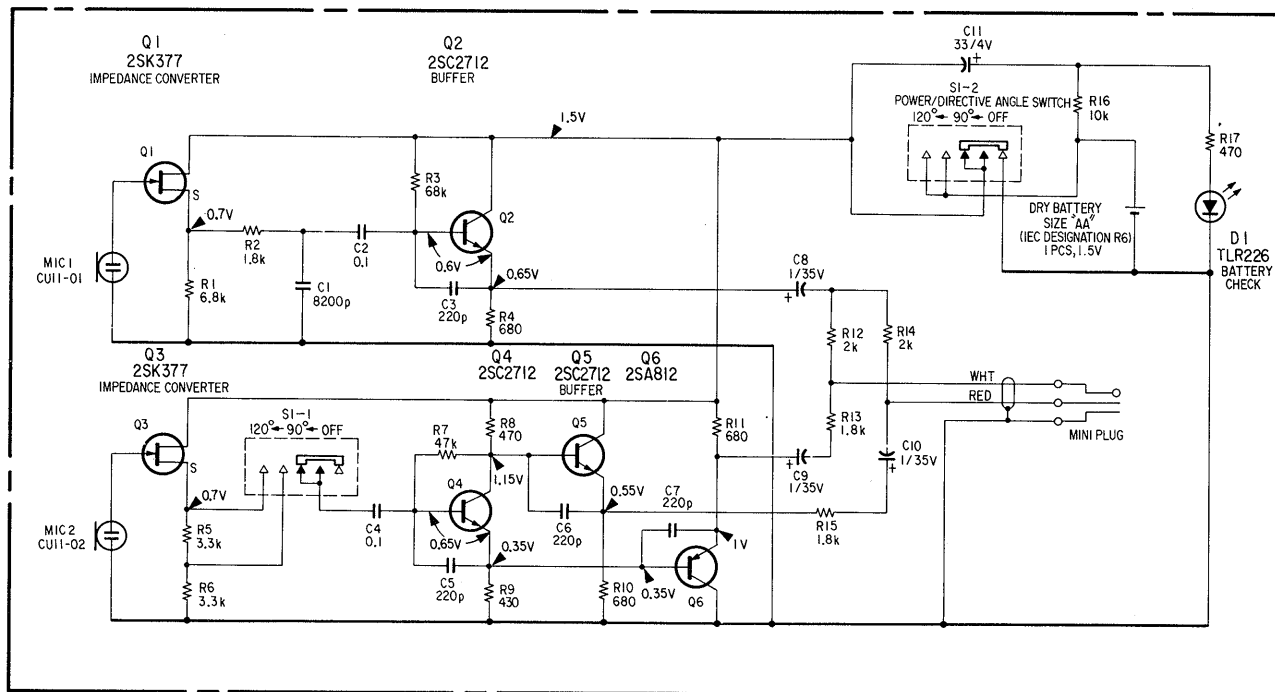

Turn the cap counterclockwise.

DISASSEMBLY

Note: Follow the disassembly procedure in the numerical order given.

SCHEMATIC DIAGRAM

Note on Schematic Diagram:

- All capacitors are in μF unless otherwise noted. pF : μF 50WV or less are not indicated except for electrolytics and tantalums.
- All resistors are in Ω and $\frac{1}{4}\text{W}$ or less unless otherwise specified.
- Voltages are taken with a VOM (Input Impedance $10\text{M}\Omega$). Voltage variations may be noted due to normal production tolerances.

PRINTED WIRING BOARDS

• Semiconductor Lead Layouts

2SK377

TLR226

2SA1162
2SC2712G

Note on Printed Wiring Board:

- : parts extracted from the component side.
- : Pattern on the side which is seen.
- Never reuse a disconnected chip component.
- Notice that the minus side of a tantalum capacitor may be damaged by heat.

EXPLODED VIEW AND PARTS LIST

NOTE:

- The mechanical parts with no reference number in the exploded views are not supplied.
- Items marked "*" are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.

ELECTRICAL PARTS LIST

NOTE:

- Due to standardization, replacements in the parts list may be different from the parts specified in the diagrams or the components used on the set.
- -XX and -X mean standardized parts, so they may have some difference from the original one.
- RESISTORS
All resistors are in ohms.
METAL: Metal-film resistor.
METAL OXIDE: Metal oxide-film resistor.
F: nonflammable

- Items marked "*" are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.
- SEMICONDUCTORS
In each case, μ : μ , for example:
 μA ... μA .. μPA ... μPA ..
 μPB ... μPB .. μPC ... μPC .. μPD ... μPD ..
● CAPACITORS
 μF : μF
● COILS
 μH : μH

When indicating parts by reference number, please include the board.
